

Release Notes

Scribe Adapter for Dynamics GP for Microsoft Dynamics GP

Version	4.3.1
Release Date	May 15, 2013

Requirements

- Scribe Insight 7.6.1 or later
- Microsoft Dynamics GP version 10.0 SP4 or later, 2010 (version 11), or 2013 (version 12)
- Microsoft Dynamics GP eConnect. You must have the appropriate version of eConnect for your version of Microsoft Dynamics GP.

What's new in Version 4.3.1

Version 4.3.1 of the Scribe Adapter for Microsoft Dynamics GP provides a technical alignment of the Dynamics GP Adapter with Insight version 7.6.1.

Microsoft has discontinued support for Microsoft Dynamics GP version 9.0. Therefore, Scribe Software also no longer supports Dynamics GP version 9.0. For more information, see the [Microsoft Support Lifecycle for Dynamics GP](#) page.

Microsoft Dynamics GP does not support Unicode data. Therefore, the Unicode features in Scribe Insight v7.5 and later releases are not supported with this Adapter.

Upgrade notes

If your site uses Publishers for Dynamics GP, you will need to reconnect and save each Publisher to allow Dynamics GP to recognize updates to the Publishers.

If you are upgrading from any previous version of the Scribe Adapter for Dynamics GP, you will need to execute a set of SQL scripts that contain the metadata shipped with this Adapter. In all cases, you must run the GP Metadata script. Other scripts depend on the Dynamics GP modules installed at your site.

Execute the files from the directory for your version of Dynamics GP:

- **Dynamics GP 10 SP4** – Installed in ...\\Scribe\\Dynamics GP 10:
 - GP Metadata 10.0.sql – Always required.
 - GP AAMetadata 10.0.sql – Analytical Accounting module.
 - GP FAMetadata 10.0.sql – Fixed Asset module.
 - GP FSMetadata 10.0.sql – Field Service module.
 - GP PAMetadata 10.0.sql – Project Accounting module.
- **Dynamics GP 2010 (version 11)** – Installed in ...\\Scribe\\Dynamics GP 11:
 - GP Metadata 11.0.sql – Always required.
 - GP AAMetadata 11.0.sql – Analytical Accounting module.
 - GP FAMetadata 11.0.sql – Fixed Asset module.
 - GP FSMetadata 11.0.sql –Field Service module.
 - GP PAMetadata 11.0.sql – Project Accounting module.
- **Dynamics GP 2013 (version 12)** – Installed in ...\\Scribe\\Dynamics GP 12:
 - GP Metadata 12.0.sql – Always required.
 - GP AAMetadata 12.0.sql – Analytical Accounting module.
 - GP FAMetadata 12.0.sql – Fixed Asset module.
 - GP FSMetadata 12.0.sql –Field Service module.
 - GP PAMetadata 12.0.sql – Project Accounting module.

Fixes

Case Number	Description
51598	Update the GP Metadata scripts to remove the reference to the TWO company in the taGLTransactionLineInsert_Scribe stored procedure.

For details about the previous release, see [Release Notes for the Scribe Adapter for Dynamics GP, Version 4.3](#).

Getting Help

Scribe is dedicated to providing information as quickly as possible to those who need it. To that end, Scribe has created a [Dynamics GP forum and knowledge base](#) in the Scribe OpenMind community. Scribe customers and partners can engage with other Scribe users as well as Scribe employees through these forums to share information and ask questions about Scribe products. Additionally, Scribe users can contact Scribe support for further assistance.

Feedback

Scribe is very interested in hearing about your experiences with our products and documentation. We welcome your suggestions for improvements and encourage you to use the Scribe OpenMind community at <http://openmind.scribesoftware.com> to provide feedback. OpenMind also allows you to see information about upcoming product releases and engage in online discussions with Scribe product management and other Scribe users. Request a logon at https://openmind.scribesoftware.com/user_requests/new.
